EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Andrew Jagenow, Reg. #51842 on 9/11/07.

The application has been amended as follows:

Claims 1-10 and 24 have been canceled.

The following is an examiner's statement of reasons for allowance:

The claims are patentable over the prior art of record because the teachings of the references taken as a whole do not show or render obvious the combination set forth in claims 11, 23 and 25, including all of the structural elements recited in the claims, especially the concept of the cable handling system dispensing and retrieving cable from the mobile platform, wherein the controller determines the platform velocity according to the drive system sensor and a substantially zero tension cable velocity based at least in part on platform velocity and on a position of the outlet with respect to a point around which the mobile platform turns. The prior art of record, especially the Gelfman reference, deploys cable independently from the drive mechanism of the

vehicle. Thus, retrieving cable without requiring any direct feedback from any vehicle mechanism of movement.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
